***Specification***

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: ---DEFLECTION YOKE HAVING SHORT-CIRCUITED COIL IN CONVERGENCE YOKE PORTION-----.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Yokota (US 5430351).

Regarding claim 1, Yokota discloses a yoke device ( Fig 1 and Fig 2) comprising a main yoke portion (20) for deflecting an electron beam emitted by an electron gun (19) and a convergence yoke portion (coils 27 and 28 and core 29 of Fig 10) the main yoke portion and the convergence yoke portion being coaxially arranged (see Fig 3) as positioned in proximity to each other, the convergence yoke portion being provided with a coil having short-circuited opposite ends (see Fig 5, and lines 30-33 of column 4).

***Allowable Subject Matter***

Claims 2-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Regarding claim 2, the prior art of record neither shows nor suggests a deflection yoke device comprising all the limitations of claim 2, particularly the limitation cited in claim 2 together with limitations of claim 1.

***Other Prior Art Cited***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure : Miyazaki (US 6836200); Sakurai et al. (US 5172035) Sakurai (US 6737818).
